

Version 33.8(108) changes

- Drug images and imprint information

A new module has been added to the pharmacy package. Drug image and imprint information has been added to a number of screens throughout the software package. Drug images will be displayed in the following programs, new and refill prescriptions, edit new and refill prescriptions, add/edit drug, edit inventory, and in the ProCheck Verifier.

Drug image and imprint information is displayed as show in the example below:

Edit Drug VALIUM 10MG TABLETS (page 1)
